(54) REPAIR AND BUSINESS SUPPORT SYSTEM FOR GAS EQUIPMENT

(57)Abstract:

PURPOSE: To speedily and accurately obtain fault diagnostic information on gas equipment to be repaired and to improve the operability on the spot by connecting a fault diagnostic device which has a microcomputer inside to the electronic circuit incorporated in the gas equipment to be repaired.

CONSTITUTION: The fault diagnostic device that a repair operator carries with him is connected to the gas equipment 21 to be repaired on the spot and used for a fault diagnosis. This fault diagnostic device has the microcomputer inside. A CCD camera 4 can be connected to the fault diagnostic device 3. Thus the fault diagnostic device 3 is connected to the gas equipment 21 to be repaired to obtain the fault

diagnostic information on the gas equipment 21 to be repaired and on the basis of the fault diagnostic information and/or at a request made by the repair operator, technical information required for the repair or information required for business is

✓ taken out of various information stored previously in a storage device 12.

Consequently, the cause of a fault occurring to the gas equipment can speedily and accurately be investigated to improve the operability on the spot and comply with an emergency repair demand timely.
